SECTION 01

Platform Overview

What Ceremoney is, who it's built for, and the problem it solves

What is Ceremoney?

Ceremoney is a full-stack SaaS platform that enables couples, professional event planners, and vendors to manage every dimension of an event — from the first guest invite to the last vendor payment. It operates across three distinct user portals: a **Public Marketing Site**, a **Customer/Planner Dashboard**, and a **Vendor Portal** — all managed by a powerful **Admin Control Panel**.

Primary Target Markets

Sweden (Primary) — Swedish language, Swish payments, SEK currency, 25% VAT compliance

Global English — USD pricing, Stripe & PayPal, international vendor directory

Arabic (AR) — Full RTL layout support, Arabic typography (Cairo font)

Supported Event Types

🥂 **Wedding** — Full suite of planning tools

✝️ **Baptism** — Ceremony coordination

🎉 **Party** — Guest & venue management

🏢 **Corporate** — Professional event management

Each event type shares the same core modules but can be configured independently.

Public Site

Marketing, blog, pricing, vendor directory — no login needed

Planner Portal

Full event planning suite for couples and professional planners

Vendor Portal

Business profiles, inquiries, availability calendar, messaging

Admin Panel

Full platform control — content, orders, leads, settings

SECTION 02

User Roles & Access Levels

Six distinct roles with carefully scoped capabilities and permissions

ROLE	ACCESS LEVEL	KEY CAPABILITIES	LOGIN REQUIRED
super_admin	Full Platform	All settings, financials, user management, plugin management, vendor approvals, data reset	✅ Yes
admin	Operational	User support, content moderation, order management, vendor oversight, lead pipeline	✅ Yes
vendor	Own Business	Edit business profile, view inquiries, real-time messaging, availability calendar, reviews	✅ Yes
customer	Own Projects	Create & manage events, guests, website, budget, checklist, vendor coordination, billing	✅ Yes
collaborator	Shared Project	View/edit guest list with restricted permissions — granted by host (Elite plan only)	✅ Yes
guest	RSVP Only	Submit RSVP form, view assigned seat via QR code, sign guestbook, upload photos	❌ No account needed

💡 **Anonymous Mode — Start Without Registering**

A key differentiator: users can begin planning immediately in the browser without creating an account. All data is saved locally using the browser's storage. When they register later, all data syncs automatically to the cloud — zero data loss.

SECTION 03

Subscription Plans

Flexible tiers for individuals, professional planners, vendors, and white-label partners

Basic

Free forever

- ✓ Event website (published URL)
- ✓ Basic RSVP form
- ✓ Planning checklist
- ✓ Vendor directory access
- ✓ Notes & itinerary
- ✓ Anonymous mode (no login)

★ MOST POPULAR

Premium

299 SEK/month

- ✓ Everything in Basic
- ✓ Full guest list management
- ✓ Interactive seating chart
- ✓ Budget tracker
- ✓ Custom domain for website
- ✓ Export PDF & XLS reports
- ✓ Priority support

Elite

499 SEK/month

- ✓ Everything in Premium
- ✓ Stationery engine (place cards)
- ✓ QR entrance scanning
- ✓ Invite collaborators
- ✓ SMS credit allocation
- ✓ Advanced analytics
- ✓ Dedicated support

Vendor Plan

$19/month

For wedding professionals

Business profile listing · Portfolio photos · Vendor directory placement · Inquiry management · Review collection · Availability calendar · Analytics dashboard

White-Label

$120/month

For agencies & enterprises

Custom subdomain · Own branding & logo · Auto-premium projects for clients · Full platform customization · Remove all Ceremoney branding

SECTION 04

User Journeys

Step-by-step flows showing how each type of user experiences Ceremoney

JOURNEY A

New Visitor → Register → First Wedding Project

Complete Onboarding Flow

1. **Land on Homepage** `/`

   Discovers Ceremoney via search, social, or referral. Sees hero section, feature overview, pricing preview, testimonials, and blog.

   No login needed | Public page

2. **Register** `/register`

   Fills in: Name, Email, Password. Account created instantly. Verification email sent. Auto-redirected to planner dashboard.

   60 seconds | No credit card

3. **Create First Project** `/planner/create`

   Selects event type (Wedding), enters event name, date, and venue city. Project is created and saved to the database.

   Event name | Date picker | City

4. **Project Dashboard** `/planner/[id]`

   Sees project overview with stat cards (0 guests, 0% budget, 0 tasks). Sidebar navigation shows all 12 planning modules ready to use.

   Quick stats | Module navigation

5. **Explore Planning Modules**

   Freely navigates between Guests → Seating → Budget → Checklist → Website. Each module starts empty and fills progressively as the user plans.

   Guests | Seating | Budget | Checklist | Website

6. **Upgrade to Premium** `/planner/billing`

   When locked features are accessed, upgrade prompt appears. Selects Premium (299 SEK/mo), pays via Stripe/Swish. Features unlock immediately.

   Stripe | Swish | Instant access

JOURNEY B

Wedding Guest — No Account Required

Guest RSVP & Day-of Experience

1. **Receives RSVP Link**

   Gets a WhatsApp/email link from the couple: `ceremoney.com/rsvp/sarah-and-tom`. No account needed to open.

2. **Submits RSVP**

   Fills: Full name, attending (Yes/No), meal preference (Meat/Vegetarian/Vegan/Halal), dietary notes, plus-one details, answers to custom questions set by couple.

3. **Browses Wedding Website**

   Sees couple's story, wedding schedule, venue details, photo gallery, and registry links — all on the same branded page.

4. **Day-of: QR Code Seat Finder (Elite)**

   Scans printed QR at venue entrance → opens `/seat-finder` → sees name → assigned table number → walks to seat.

   Elite plan only | No app needed

JOURNEY C **Vendor — Building & Growing Their Business**

Vendor Onboarding to Active Engagement

1. **Register as Vendor**
   Signs up with vendor role. Redirected to vendor dashboard at `/vendor/dashboard`.

2. **Build Business Profile**
   Adds: business name, bio, service category, portfolio photos, pricing packages, Instagram/Facebook/Pinterest links, service area cities.

3. **Set Availability Calendar**
   Marks available/booked dates. Couples see real-time availability when viewing profile.

4. **Receive & Respond to Inquiries**
   Gets real-time notification when couple sends inquiry. Replies via messaging system. Uses quick-reply templates for fast responses.

5. **Track Performance**
   Views analytics: profile views, inquiry rate, review score, response time. Post-event, couple leaves a review which appears publicly on profile.

SECTION 05 — PLANNER MODULE

Guest Management

Complete guest lifecycle from invitation to RSVP confirmation

Guest Management Module

`/planner/[id]/guests`

• Available: Basic+

ceremoney.com/planner/proj_abc123/guests

120	84	24	12
Total Guests	Confirmed	Pending	Declined

Ahmed Khan
Groom's side · Best Man · Halal meal · +1: Fatima
✓ Attending

Lisa Bergström
Bride's side · Maid of Honor · Vegetarian
✓ Attending

Thomas Andersson Sr.
Groom's side · Parent · Meal not set
··· Pending

Julia Eriksson
Bride's side · Cousin · Gluten-free
✗ Declined

- → Add guests with full profile (name, email, phone)
- → Assign side: Bride's or Groom's
- → 14 relation types (MOH, Best Man, Parent, Friend...)
- → Track RSVP: Pending / Attending / Declined
- → Meal preferences (6 options including Halal/Vegan)
- → Plus-One management with separate meal choice
- → Chief Guest / VIP designation
- → Group guests into Family units
- → Bulk import via CSV file
- → Filter by side, relation, RSVP status
- → Search by name or email
- → Export to PDF or Excel (Premium+)

SECTION 06 — PLANNER MODULE

Seating Chart

Interactive drag-and-drop floor plan editor for ceremony and reception

Seating Chart Editor

/planner/[id]/seating

• Premium+

Ceremony Layout

Row-based seating arrangement for the ceremony venue. Supports aisles, sections (bride's/groom's side), and special positions (front row, VIP area).

`/seating/ceremony-layout-edit`

Reception Layout

Table-based floor plan with Round, Rectangle, and Head Table options. Set capacity per table, assign guests by drag-and-drop, detect conflicts in real time.

`/seating/reception-layout-edit`

Place Cards

Design and print guest name/place cards for each table. Select template, font, and layout. Export all cards as a single print-ready PDF.

`/seating/cards-edit`

Menu Assignment

Assign menus per table or per guest based on their meal preference. Useful for coordinating with caterers on day of event.

`/seating/menu-edit`

QR Seat Finder (Elite Plan)

Once seating is finalized, generate a QR code to display at the venue entrance. Guests scan with their phone and instantly see their assigned table — no staff assistance needed. Accessible at `/public/seat-finder/[projectId]`.

SECTION 07 — PLANNER MODULE

Budget Tracker

Track planned vs actual spending across all wedding categories

Budget Management

`/planner/[id]/budget`

• Available: Basic+

Budget Overview

Set total budget. See Planned Total, Actual Spent, and Remaining at a glance with a visual progress bar and percentage indicator.

Categories

Organize spending into categories: Venue, Catering, Photography, Flowers, Cake, Music, Transport, Honeymoon, and custom categories.

Line Items

Each category holds line items: vendor name, planned amount, actual invoice amount, paid amount, due date, and notes.

⚠️ **Overspend Alerts**

When actual spending in any category exceeds the planned amount, that category is highlighted in red with an overspend warning — helping couples stay on track before costs spiral.

SECTION 08 — PLANNER MODULE

Wedding Website Builder

Create a beautiful, custom website for your guests — no coding required

🌸

Wedding Website + RSVP

`/planner/[id]/website`

• Available: Basic+

Website Creation → Publishing → Guest Access

1. **Initial Setup**
   Choose your website URL slug (e.g. sarah-and-tom), upload cover photo, set website title and wedding date.

2. **Build with Blocks**
   Add blocks: Hero Banner, Our Story, Event Schedule, Venue Map, Photo Gallery, Registry Links, RSVP Form, and Guestbook. Rearrange by drag-and-drop.

3. **Publish & Share**
   Click Publish → website goes live at `ceremoney.com/rsvp/[your-slug]`. Share via WhatsApp, email, or social media.

4. **Manage RSVPs in Real-Time**
   As guests submit RSVPs, the planner dashboard updates instantly. View all responses, filter by status, see meal breakdowns.

Available Website Blocks

Hero Banner · Our Story · Event Schedule · Venue & Map · Photo Gallery · RSVP Form · Guestbook · Registry Links · Guest Photos · Countdown Timer

Custom RSVP Questions

Beyond the standard RSVP fields, couples can create custom questions: "Will you need a shuttle?", "Song request?", "Which side are you seated on?" — any question they want answered before the big day.

SECTION 09

Vendor Directory

Browse, contact, and review wedding professionals all in one place

13 Vendor Categories

Venue · Photography · Videography · Catering · DJ & Band · Florist · Cake · Hair & Makeup · Officiant · Transportation · Stationery · Photo Booth · Wedding Planner

Real-Time Messaging

After sending an inquiry, a conversation thread opens. Both couple and vendor communicate in real-time via Socket.io. Vendors use quick-reply templates for faster responses.

Review System

After the event, couples leave star ratings and written reviews on vendor profiles. All reviews are public and help future couples make decisions.

ceremoney.com/vendors/nordic-lens-photography

Nordic Lens Photography

Stockholm · Photography · 4.8 (63 reviews)

"We specialize in candid, documentary-style wedding photography that tells your story naturally..."

SECTION 10

Payment & Checkout Flow

Multiple payment methods with automatic invoicing and subscription management

Select Service or Plan
Choose package & options

→

Fill Service Form
Dynamic fields + uploads

→

Location & Fees
State fees + VAT auto-calc

→

Choose Payment
Stripe · PayPal · Swish · Klarna

→

Confirmed
Order + Invoice emailed

Stripe

Global card payments. Saved payment methods. Subscription management via Customer Portal.

PayPal

Global PayPal payments. One-click checkout for returning users.

Swish

Swedish mobile payment. Scan QR or enter phone number. Instant confirmation.

Klarna

Buy Now Pay Later. Split into 3 interest-free installments.

Automatic Swedish VAT & Invoicing

For Swedish users, 25% Moms (VAT) is automatically calculated and displayed at checkout. After payment, a professional PDF invoice with Org.nr, VAT breakdown, and invoice number is generated and emailed instantly. Users can download all invoices from their dashboard at any time.

SECTION 11

Admin Control Panel

Complete platform management — content, users, orders, leads, appearance, and settings

Dashboard

KPI overview: total revenue, active orders, new leads, registered users. Quick-action shortcuts for the most common admin tasks.

User Management

Full user database with role management, account status, login history, and the ability to impersonate users for support purposes.

Service Management

Create and edit services with packages, location-based pricing, dynamic form builder, feature comparison tables, and FAQs.

Lead Management

Pipeline view (Kanban-style), lead scoring with decay algorithm, activity timeline, convert leads to customers, analytics dashboard.

Order Management

Full order lifecycle: track status, view documents, add internal notes, edit orders, generate/download invoices, bulk operations.

Appearance Builder

Visual header/footer builder, 70+ widget page builder, multiple theme system with color customization, landing page editor — no code needed.

Content Management

Full blog CMS, FAQ management, testimonials, legal pages (privacy, terms, disclaimer, refund policy) — all editable from the admin panel.

Support Tickets

Ticket inbox with priority levels, AI-assisted response suggestions, canned responses, internal notes, and performance analytics.

Marketing & Newsletter

Create email campaigns, manage newsletter subscribers, track open rates and click-throughs, auto-publish blog posts as newsletters.

SECTION 12

Real-World Use Cases

How different users experience Ceremoney in practice

Sarah & Tom — Planning Their Stockholm Wedding

Customer · Premium Plan · 120 guests

Sarah and Tom are getting married in Stockholm. They register on Ceremoney (free), create a wedding project, and immediately start adding their 120 guests. They build a beautiful wedding website in Swedish, set up the RSVP form with a custom question ("Will you need the shuttle bus?"), and share the link via WhatsApp. They upgrade to Premium to unlock the seating chart — where they spend an afternoon arranging 12 tables. The budget tracker helps them stay within their 150,000 SEK budget. On the wedding day, guests with the Elite QR code find their tables instantly.

Register Free · Create Project · Add 120 Guests · Build Website · Set RSVP Link · Upgrade Premium · Build Seating Chart · Track Budget

Maria — Professional Wedding Planner

Customer · Elite Plan · 5 active projects

Maria manages 5 couples simultaneously. She creates separate projects for each, grants collaborator access so each couple can see their own guest list, sends vendor event briefs (tokenized share links) to photographers and caterers without them needing an account. She tracks all vendor payments via the budget module and uses the itinerary builder to create detailed day-of timelines for each couple. The Elite QR entrance feature is her most-requested add-on.

5 Projects · Collaborator Access · Vendor Briefs · Budget Tracking · Day-of Itinerary · QR Entrance

Bloom & Petal — Stockholm Florist

Vendor · Business Plan · $19/month

A Stockholm florist registers as a vendor, uploads their portfolio (15 photos), sets their availability for weekends only, and lists their pricing packages. They receive 8 inquiries per month through the Ceremoney directory, reply using quick-reply templates ("Thanks for reaching out! We'd love to discuss your vision..."), and track their 4.9-star review score. The vendor dashboard shows profile views trending upward since adding more portfolio photos.

Register Vendor · Upload Portfolio · Set Availability · Receive Inquiries · Message Couples · Collect Reviews

Ahmed — Wedding Guest in Dhaka

Guest · No account required

Ahmed receives a WhatsApp message from the couple with a link. He opens `ceremoney.com/rsvp/sarah-and-tom` on his phone — no app to download, no account to create. He confirms attendance for himself and his wife, selects Halal meals for both, answers "Yes" to the shuttle question, and leaves a note. On the wedding day he scans a printed QR code at the entrance and sees "Table 7 — Ahmed Khan" on his screen. He signs the digital guestbook after the ceremony.

Open RSVP Link · Confirm Attendance · Select Halal Meal · Answer Questions · Scan QR at Venue · Sign Guestbook

SECTION 14

Technology & Architecture

The technical foundation that powers Ceremoney's reliability and performance

Next.js 15 (App Router)

Server Components for SEO & performance. React for interactive UI. Deployed on Vercel with global CDN.

TypeScript 5.9

Full type safety across the entire codebase — frontend, backend, API routes, and database queries.

PostgreSQL + Prisma

95+ database models on AWS RDS. Prisma ORM for type-safe queries and schema migrations.

Tailwind CSS 4

Utility-first styling with a 4px spacing system. Mobile-first responsive design. Full RTL support.

Socket.io

Real-time bidirectional communication for live vendor-couple messaging and collaborative planning.

Konva.js

Canvas-based interactive seating chart editor with drag-and-drop, zoom, and conflict detection.

- **AWS S3 + CloudFront**
  File uploads via presigned URLs. Global CDN delivery for photos and documents.

- **Stripe + PayPal + Swish**
  Multi-gateway payments. Stripe for subscriptions & invoicing. Swish for Sweden. Klarna for BNPL.

- **next-intl (i18n)**
  Swedish, English, and Arabic localization. Full RTL layout for Arabic with Cairo typography.

Deployment Architecture

Frontend: Vercel (Next.js, global edge network) · **API:** AWS ECS (containerized) · **Database:** AWS RDS PostgreSQL · **Storage:** AWS S3 + CloudFront CDN · **Real-time:** Socket.io server (separate process)
