TECHNICAL DOCUMENTATION · V1.0 · APRIL 2026

Ceremoney

Complete Route Documentation

Every page route, API endpoint, access requirement, and HTTP method in the Ceremoney platform — organized for developers, QA engineers, and product teams.

85+	200+	6	5
PAGE ROUTES	API ENDPOINTS	ROLE LEVELS	ROUTE GROUPS

Public Routes · Auth Routes · Planner Routes · Vendor Routes · Admin Routes · API Endpoints · HTTP Methods · Access Control

HOW TO READ

Legend & Reference

Color codes, badge meanings, and notation used throughout this document

🔒 Access Level Badges

- **PUBLIC** — No login required — anyone can access
- **AUTH** — Any logged-in user
- **PLANNER** — Logged-in customer with planner access
- **VENDOR** — Registered vendor role only
- **ADMIN** — Admin or super_admin role
- **GUEST** — Event guest — no account, token-based

⚡ HTTP Method Badges

- **GET** — Retrieve data — safe, cacheable
- **POST** — Create new resource
- **PUT** — Replace entire resource
- **PATCH** — Partial update of resource
- **DELETE** — Remove a resource

📄 Path Notation

- `[id]` — Dynamic segment (any value)
- `[slug]` — URL-friendly string identifier
- `[token]` — Secure share token
- `[...path]` — Catch-all segments
- `(group)` — Next.js route group (not in URL)

📁 Route Groups (Next.js)

- `(marketing)` — Public-facing site
- `(auth)` — Login / Register pages
- `dashboard/` — Customer portal
- `planner/` — Event planning suite
- `admin/` — Admin control panel
- `vendor/` — Vendor business portal

🔑 Special Tokens

RSVP slug — Human-readable couple identifier

Share token — Cryptographic project share URL

Brief token — Vendor event brief access token

Project ID — Cuid-format database identifier

Webhook secret — Stripe/PayPal event verification

⚠️ Auth Notes

All API routes return `401` for unauthenticated requests where auth is required

Role mismatch returns `403` Forbidden

Anonymous planner data stored in localStorage, synced on login

Vendor routes require admin approval first

SECTION 01

Public Page Routes

Marketing site, legal pages, and event pages accessible without authentication

🌐 **Route Group: `(marketing)`**

All routes in this group are wrapped in the marketing layout (Header + Footer + TrackingScripts + PluginLoader). No authentication middleware applied. Indexed by search engines. Supports i18n (SE, EN, AR).

🏠 Core Marketing Pages

8 routes

ROUTE	PAGE / PURPOSE	ACCESS	NOTES
`/`	Homepage — hero, features, pricing preview, testimonials	PUBLIC	Dynamic landing page builder (admin-configurable)
`/pricing`	Plan comparison — Basic, Premium, Elite, Vendor, White-Label	PUBLIC	Prices pulled from DB settings
`/about`	About Ceremoney — company info, mission, team	PUBLIC	
`/contact`	Contact form — submits lead to admin CRM	PUBLIC	Has own layout wrapper
`/faq`	Global FAQ page with accordion sections	PUBLIC	
`/search`	Site-wide search results page	PUBLIC	Query param: `?q=`
`/newsletter`	Newsletter subscription landing page	PUBLIC	
`/[slug]`	Dynamic CMS pages created in admin panel	PUBLIC	Catch-all for custom pages

🛍️ Services & Vendors

5 routes

ROUTE	PAGE / PURPOSE	ACCESS	NOTES
`/services`	Service catalog listing with category filters	PUBLIC	
`/services/[slug]`	Individual service page — packages, features, FAQ, CTA	PUBLIC	Package comparison table
`/vendors`	Vendor directory — browse by category & city	PUBLIC	13 vendor categories
`/vendors/[slug]`	Public vendor profile — portfolio, pricing, reviews	PUBLIC	Save requires login
`/conversation`	Couple ↔ Vendor messaging threads	AUTH	

✍️ Blog & Content

4 routes

ROUTE	PAGE / PURPOSE	ACCESS	NOTES
`/blog`	Blog listing with category filters and search	PUBLIC	Paginated, SEO-optimized
`/blog/[slug]`	Individual blog post with author, categories, related posts	PUBLIC	JSON-LD structured data
`/privacy`	Privacy Policy (GDPR compliant)	PUBLIC	Editable from admin
`/terms`	Terms of Service	PUBLIC	Editable from admin

Guest-Facing Event Routes

5 routes

ROUTE	PAGE / PURPOSE	ACCESS	NOTES
`/rsvp/[slug]`	Wedding RSVP page — couple's custom wedding website	GUEST	No account needed. Slug set by couple.
`/brief/[token]`	Event brief page — shared with vendors via secure token	GUEST	Token expires after use
`/checkout`	Service checkout — form, location, payment	AUTH	Requires login to complete order
`/planner/share/[token]`	Shared planner project view for collaborators	AUTH	Token-based project access
`/planner/sync`	Sync localStorage data to database after login	AUTH	One-time migration page

SECTION 02

Authentication Routes

Login, registration, and password recovery — wrapped in the auth layout (no header/footer)

Auth Pages — Route Group: `(auth)`

3 routes

ROUTE	PAGE / PURPOSE	ACCESS	POST-LOGIN REDIRECT
`/login`	Sign-in form — email + password OAuth providers can be added	PUBLIC	customer → `/dashboard` vendor → `/vendor/dashboard` admin → `/admin`
`/register`	New account creation — name, email, password	PUBLIC	→ `/planner` after registration
`/forgot-password`	Password recovery — sends reset link via email	PUBLIC	→ Email with reset link

SECTION 03

Customer Dashboard Routes

Order management, invoices, documents, profile — all require authentication

Dashboard — `/dashboard/*`

8 routes

ROUTE	PAGE / PURPOSE	ACCESS	NOTES
`/dashboard`	Overview — active projects, recent orders, quick actions	AUTH	Shows planner project cards
`/dashboard/orders`	Full order history with status badges	AUTH	
`/dashboard/orders/[id]`	Individual order detail — timeline, documents, notes	AUTH	Shows progress steps
`/dashboard/invoices`	Invoice listing with download buttons	AUTH	PDF download available
`/dashboard/documents`	Uploaded documents per order	AUTH	
`/dashboard/profile`	Edit name, email, password, profile photo	AUTH	
`/dashboard/billing`	Subscription status, saved payment methods	AUTH	Stripe Customer Portal link
`/dashboard/help`	Help center — FAQs, create support ticket	AUTH	

SECTION 04

Wedding Planner Routes

The core planning suite — 20+ dedicated routes for full event management

Dual-Mode Architecture

All planner routes work in **anonymous mode** (data stored in localStorage via `planner-storage.ts`) and **authenticated mode** (data synced to PostgreSQL via API). Users can start planning immediately without an account.

Planner Root — `/planner/*`

4 routes

ROUTE	PAGE / PURPOSE	ACCESS	NOTES
`/planner`	Projects list — all events created by user	PLANNER	Shows project cards with status
`/planner/create`	Create new event project — type, name, date, city	PLANNER	4 event types available
`/planner/billing`	Upgrade plan — Basic → Premium → Elite	PLANNER	Stripe Checkout integration
`/planner/sync`	Migrate localStorage data to database after login	PLANNER	One-time sync on first login

Project Pages — `/planner/[id]/*`

16 routes

ROUTE	PAGE / PURPOSE	PLAN REQUIRED	NOTES
/planner/[id]	Project overview — stat cards, quick navigation	Basic+	Guests confirmed, budget %, tasks done
/planner/[id]/guests	Guest list management — add, edit, RSVP tracking	Basic+	CSV import available
/planner/[id]/seating	Seating chart hub — choose ceremony or reception layout	Premium+	
/planner/[id]/seating/ceremony-layout-edit	Konva.js canvas editor — ceremony row seating	Premium+	Drag-and-drop, aisle support
/planner/[id]/seating/reception-layout-edit	Konva.js canvas editor — reception table seating	Premium+	Round, Rectangle, Head Table types
/planner/[id]/seating/cards-edit	Place card / name card designer + PDF export	Elite+	Stationery engine
/planner/[id]/seating/menu-edit	Per-table or per-guest menu assignment	Premium+	
/planner/[id]/budget	Budget tracker — categories, line items, spending overview	Basic+	SEK / USD / BDT
/planner/[id]/checklist	Pre-populated planning checklist by timeline	Basic+	Custom tasks supported
/planner/[id]/itinerary	Day-of timeline editor — time, title, location, person	Basic+	Drag-to-reorder events
/planner/[id]/vendors	Vendor coordination — add, track payments, contact	Basic+	
/planner/[id]/website	Wedding website block builder + RSVP management	Basic+	Custom domain: Premium+
/planner/[id]/ceremony	Ceremony venue details — name, address, time, notes	Basic+	
/planner/[id]/reception	Reception venue details — name, address, time, notes	Basic+	
/planner/[id]/notes	Free-form notes and ideas throughout planning	Basic+	
/planner/[id]/settings	Project settings — name, date, share link, clone, archive	Basic+	Generate share token here

SECTION 05

Vendor & Admin Routes

Business portal for vendors and the full admin control panel

Vendor Portal — /vendor/*

1 main route

ROUTE	PAGE / PURPOSE	ACCESS	NOTES
/vendor/dashboard	Vendor hub — profile, inquiries, messages, calendar, reviews, analytics	VENDOR	Admin approval required before access

Admin Panel — /admin/*

50+ routes

ROUTE	PAGE / PURPOSE	ACCESS
`/admin`	Admin dashboard — KPIs, revenue, orders, leads overview	ADMIN
`/admin/users`	User management — list, search, role assignment	ADMIN
`/admin/customers`	Customer database with order history	ADMIN
`/admin/customers/[id]`	Individual customer profile — orders, tickets, notes	ADMIN
`/admin/orders`	All orders — status, filtering, bulk actions	ADMIN
`/admin/orders/[id]`	Order detail — edit, documents, notes, status update	ADMIN
`/admin/invoices`	All invoices — download, filter, regenerate	ADMIN
`/admin/leads`	Lead database with scoring and status	ADMIN
`/admin/leads/pipeline`	Kanban pipeline — New, Contacted, Qualified, Won	ADMIN
`/admin/leads/analytics`	Lead conversion analytics dashboard	ADMIN
`/admin/services`	Service catalog management	ADMIN
`/admin/services/[slug]/form-builder`	Dynamic form builder for service checkout	ADMIN
`/admin/tickets`	Support ticket inbox — priority, assignment	ADMIN
`/admin/marketing/newsletters`	Newsletter campaign management	ADMIN
`/admin/appearance/landing-page`	No-code page builder with 70+ widgets	ADMIN
`/admin/appearance/themes`	Theme selection and installation	ADMIN
`/admin/appearance/themes/customize`	Theme color, font, spacing customization	ADMIN
`/admin/appearance/header`	Visual header builder — layout, logo, menu	ADMIN
`/admin/appearance/footer`	Footer builder — 7 layout presets, widgets	ADMIN
`/admin/content/blog`	Blog CMS — create, edit, publish posts	ADMIN
`/admin/content/legal`	Legal page editor — privacy, terms, refund	ADMIN
`/admin/settings/payments`	Payment gateway config — Stripe, PayPal keys	ADMIN
`/admin/settings/plugins`	Plugin management — install, activate, configure	ADMIN
`/admin/settings/tracking`	Analytics pixels — GTM, GA4, Facebook, TikTok	ADMIN
`/admin/planner`	Monitor all active wedding projects platform-wide	ADMIN

SECTION 06

API Routes — Authentication & Users

All endpoints under `/api/` — RESTful JSON API

ℹ️ **Base URL**

All API routes are prefixed with `/api/` in Next.js App Router. Protected routes validate JWT via NextAuth and return `401 Unauthorized` or `403 Forbidden` when access is denied.

Authentication & Session

6 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
GET	/auth/me	Get current authenticated user	AUTH
POST	/auth/login	Email + password sign-in	PUBLIC
POST	/auth/register	Create new customer account	PUBLIC
GET POST	/auth/[...nextauth]	NextAuth.js handler — sessions, JWT, providers	PUBLIC
PATCH	/customer/profile/password	Change password (requires current password)	AUTH
GET PUT	/customer/profile	Get and update customer profile	AUTH

Billing & Payments

10 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
POST	/billing/checkout	Create Stripe Checkout session for subscription	AUTH
POST	/billing/portal	Open Stripe Customer Portal for subscription management	AUTH
GET	/billing/subscription	Get current subscription plan and status	AUTH
POST	/billing/verify-session	Verify Stripe session after redirect	AUTH
POST	/webhooks/stripe	Stripe webhook — payment confirmed, subscription updated	WEBHOOK
POST	/webhooks/paypal	PayPal webhook — order captured, subscription events	WEBHOOK
POST	/paypal/create-order	Create PayPal order for checkout	AUTH
POST	/paypal/capture-order	Capture approved PayPal payment	AUTH
GET	/checkout/gateways	List available payment methods for user's region	AUTH
GET PUT	/customer/billing/payment-methods	Manage saved payment cards	AUTH

SECTION 07

Planner API Routes

40+ endpoints powering the wedding planning suite

Projects

5 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
GET	/planner/projects	List all projects for current user	PLANNER
POST	/planner/projects	Create new event project	PLANNER
GET	/planner/projects/[id]	Get single project with full details	PLANNER
PUT	/planner/projects/[id]	Update project name, date, venue, status	PLANNER
POST	/planner/projects/[id]/copy	Clone entire project (all data)	PLANNER

Guests

8 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
GET	/planner/projects/[id]/guests	List all guests with RSVP status, meal prefs	PLANNER
POST	/planner/projects/[id]/guests	Add single guest	PLANNER
PUT	/planner/projects/[id]/guests/[gid]	Update guest details, RSVP, meal	PLANNER
DELETE	/planner/projects/[id]/guests/[gid]	Remove guest from list	PLANNER
POST	/planner/projects/[id]/guests/bulk	Bulk import guests from CSV	PLANNER
GET	/planner/projects/[id]/families	List family groups	PLANNER
POST	/planner/projects/[id]/families	Create guest family group	PLANNER
GET PUT	/planner/projects/[id]/rsvp-questions	Custom RSVP form questions	PLANNER

Seating · Budget · Checklist · Itinerary

16 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
GET POST	/planner/projects/[id]/seating	Get / create seating layouts (ceremony & reception)	PLANNER
PUT	/planner/projects/[id]/seating/[lid]	Update layout — tables, positions, assignments	PLANNER
GET POST	/planner/projects/[id]/budget	Get all budget categories with line items	PLANNER
POST	/planner/projects/[id]/budget/categories	Add budget category	PLANNER
POST	/planner/projects/[id]/budget/items	Add budget line item to category	PLANNER
PATCH	/planner/projects/[id]/budget/items/[bid]	Update line item (actual amount, paid status)	PLANNER
GET POST	/planner/projects/[id]/checklist	Get / add checklist tasks	PLANNER
PATCH	/planner/projects/[id]/checklist/[tid]	Mark task complete / incomplete	PLANNER
GET POST	/planner/projects/[id]/itinerary	Get / add day-of timeline events	PLANNER
PUT	/planner/projects/[id]/itinerary/[eid]	Update itinerary event — time, title, location	PLANNER
GET PUT	/planner/projects/[id]/website	Get / update wedding website configuration & blocks	PLANNER
GET PUT	/planner/projects/[id]/ceremony	Ceremony venue details	PLANNER
GET PUT	/planner/projects/[id]/reception	Reception venue details	PLANNER
POST	/planner/projects/[id]/share	Generate secure share token for project	PLANNER
POST	/planner/projects/[id]/brief	Generate vendor event brief token	PLANNER
POST	/planner/sync	Migrate localStorage data to database	PLANNER

SECTION 08

Vendor & Public API Routes

Vendor management, public directory, RSVP submissions, and content endpoints

Vendor Portal API

12 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
POST	/vendor/register	Register as vendor (pending admin approval)	AUTH
GET PUT	/vendor/profile	Get / update vendor business profile	VENDOR
GET POST	/vendor/availability	Get / set availability calendar dates	VENDOR
GET	/vendor/inquiries	List all inquiries received from couples	VENDOR
GET	/vendor/conversations	List all messaging threads	VENDOR
GET	/vendor/reviews	View all reviews from couples	VENDOR
GET POST	/vendor/quick-replies	Quick reply message templates	VENDOR
GET	/vendor/stats	Profile views, inquiry count, response rate	VENDOR
GET	/vendor/plan	Current vendor plan and expiry	VENDOR
GET	/vendors	Public vendor directory — filter by category/city	PUBLIC
GET	/vendors/[slug]	Public vendor profile data	PUBLIC
POST	/vendors/[slug]/inquiries	Send inquiry to vendor (creates conversation)	AUTH

💗 Public Event & RSVP API

8 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
GET	/public/rsvp/[slug]	Get wedding website data for RSVP page	PUBLIC
POST	/rsvp/[token]	Submit guest RSVP response	PUBLIC
GET	/public/seat-finder/[projectId]	Look up guest seat assignment by name	PUBLIC
GET POST	/guestbook/[websiteId]	Get / add guestbook entries	PUBLIC
POST	/guest-photos/[websiteId]	Upload guest photos to wedding website	PUBLIC
GET	/brief/[token]	Get event brief data (vendor access)	TOKEN
GET	/planner/share/[token]	Access shared project via token	AUTH
POST	/newsletter/subscribe	Subscribe email to newsletter	PUBLIC

SECTION 09

Admin API Routes

100+ admin endpoints for complete platform management

📦 Orders & Invoices

10 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
GET	/admin/orders	List all orders with filters (status, date, customer)	ADMIN
GET	/admin/orders/[id]	Single order detail with items, documents, notes	ADMIN
PUT	/admin/orders/[id]	Update order status, assigned staff, notes	ADMIN
POST	/admin/orders/bulk	Bulk status update, export	ADMIN
GET	/admin/invoices	All invoices with download links	ADMIN
GET	/admin/customers	Customer list with order counts, plan tier	ADMIN
GET	/admin/customers/[id]	Customer profile, orders, tickets, activity	ADMIN
GET	/admin/users	All users with role filter	ADMIN
PUT	/admin/users/[id]	Update user role, status, permissions	ADMIN
DELETE	/admin/users/[id]	Delete user account	ADMIN

📈 Leads & Marketing

12 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
GET	/admin/leads	Lead list with score, status, source	ADMIN
GET	/admin/leads/[id]	Lead detail with activity timeline	ADMIN
PATCH	/admin/leads/[id]	Update lead stage, assigned rep	ADMIN
POST	/admin/leads/[id]/convert	Convert lead to customer account	ADMIN
POST	/admin/leads/[id]/activities	Log call, email, meeting activity	ADMIN
GET	/admin/leads/duplicates	Find duplicate leads by email/phone	ADMIN
POST	/leads	Submit web form lead (from contact page)	PUBLIC
GET POST	/admin/campaigns	Email marketing campaigns	ADMIN
GET POST	/admin/marketing/newsletters	Newsletter subscriber list management	ADMIN
GET POST	/admin/email-templates	Email template library	ADMIN
GET	/newsletter/track/open	Track email open (pixel hit)	PUBLIC
GET	/newsletter/track/click	Track email link click + redirect	PUBLIC

🎨 Appearance & Settings

12 endpoints

METHOD	ENDPOINT	PURPOSE	ACCESS
GET PUT	/admin/header	Header layout, logo, menu config	ADMIN
GET PUT	/admin/footer	Footer layout, widgets, social links	ADMIN
GET	/admin/footer/presets	Pre-built footer template designs	ADMIN
GET PUT	/admin/appearance	Active theme, global colors, fonts	ADMIN
GET POST	/admin/themes	List installed themes, import/export	ADMIN
GET POST	/admin/landing-pages	Landing page list and creation	ADMIN
PUT	/admin/landing-pages/[id]/blocks	Save page builder block layout	ADMIN
GET PUT	/admin/settings/[key]	Key-value settings (email, payments, etc.)	ADMIN
GET POST	/admin/plugins	Plugin install, activate, configure	ADMIN
GET	/header	Public header config for site rendering	PUBLIC
GET	/footer	Public footer config for site rendering	PUBLIC
GET	/business-config	Business name, logo, contact info	PUBLIC

SECTION 10

Route Summary & Statistics

Complete breakdown of all routes by category and access level

85+

Page Routes

Next.js App Router pages visible to users

200+

API Endpoints

RESTful JSON endpoints under /api/

6

Role Levels

super_admin · admin · vendor · customer · collaborator · guest

ROUTE GROUP	PAGE COUNT	API ENDPOINTS	AUTH REQUIRED	PRIMARY USERS
PUBLIC (marketing)	~20 routes	~15 endpoints	❌ None	Visitors, Guests
Auth Pages	3 routes	4 endpoints	❌ None (pre-auth)	New & returning users
Customer Dashboard	8 routes	10 endpoints	✅ Any login	Customers
Planner Suite	20 routes	40+ endpoints	✅ Customer login	Couples, Planners
Vendor Portal	1 route	12 endpoints	✅ Vendor role	Wedding Vendors
Admin Panel	50+ routes	100+ endpoints	✅ Admin role	Platform Operators
Guest / Token	3 routes	8 endpoints	❌ Token-based	Wedding Guests

✅ **Key Design Principle: Anonymous-First**

All planner page routes work without authentication using localStorage. The API layer (`/api/planner/`) is auth-protected, but the UI degrades gracefully to local storage — so users can start planning with zero friction. The `/planner/sync` route handles the one-time migration when a user registers.
